Education

COER College of engineering Roorkee

Expected May 2025

Bachelors of Technology in Computer Science Engineering (percentage:72%)

Roorkee, Uttarakhand

- **Relevant Coursework:** Data Structures and Algorithms, Design algorithm & analysis, Database management system, Computer Networks and Applications.

B.D College Patna ,Bihar

April-2018-May 2020

Intermediate with Science (percentage:78%)

Patna,Bihar

Technical Skills

Languages: Java, HTML, CSS, JavaScript

Development Stack: React.js, Node.js, Express.js, Bootstrap,

Database: MongoDB, MySQL

Developer Tools : GitHub ,Postman ,Vs Code, Vercel

Experience

Bharat Interns

June 2023 – June 2023

Frontend developer

- Working with HTML, I have learned the importance of semantic markup for accessibility and SEO. I gained proficiency in structuring web content using appropriate HTML elements, ensuring clarity and meaningful organization in the codebase.
- Using the CSS I have mastered the hands-on-experience of creating responsive layouts that adopt seamlessly to different screen sizes and devices .
- JavaScript was instrumental in adding interactive and dynamic behavior to web projects .

CognoRise InfoTech

March 2024 – March 2024

Frontend developer

- Developed and implemented responsive user interfaces using React.js, Bootstrap, and React Router, resulting in improved user satisfaction and engagement.
- Leveraging frameworks like React.js has enhanced my proficiency in building dynamic and interactive web pages. These frameworks enabled me to implement features such as product carousels, interactive forms, and real-time updates, significantly improve user satisfaction.

Projects

BookNest | React js,Tailwind CSS,MongoDB

[Github Link](#)

- Developed a digital coursebook purchasing platform using React.js (frontend), Node.js (backend), and MongoDB (database).
- Implemented a user-friendly, responsive design to enhance the digital coursebook browsing and purchasing experience and Integrated backend API endpoints for seamless interaction .

NewsMania | HTML, CSS, React.js, NewsAPI

[Github Link](#)

- Built a responsive news application that dynamically fetches and displays the latest news articles.
- Leveraging the power of HTML for structure, CSS for styling, and React.js for dynamic functionality, this tool offers a user-friendly interface coupled with advanced features for text processing.

Techtube | Html,Css,React.js, Bootstrap,RapidAPI

[Github Link](#)

- Web Application Development: Proficient in developing web applications using HTML, CSS, ReactJs and Rapid api for the data integration.
- A video streaming platform dedicated to tech-related content and study materials. Exclusively streams tech-related videos, ensuring a specialized and relevant library for users.Allows users to upload and search for study materials, making it a valuable resource for tech learners and professionals.

Achievements

- First prize awarded for the outstanding performance in the Robosync competition demonstrating excellence in robotics game and technical problem-solving.
